Abstract : *This development targets to contribute remedies (medicine) which are fresh or Idle. The new remedies can be given for further utilization by a poor person. This application helps the user to contribute unused remedies s to NGO. In this body there are three person namely, Admin, NGO and User. Admin will login and manage users by deleting and blocking the users providing improper or expired medications. Admin also has consultant to like the appointment asked by NGO. Admin has monthly noise of remedies which has been contributed. NGO can register and login using authorizations. They can promotion a request of appointment which will added more appropriate and list by admin. NGO manages the normal which helps to preserve the record of the existing remedies. In case of safety NGO can also modify their PIN. Users can register and login using authorizations. They can donate remedies by providing remedies detail and raising demand, further it will be agreed by admin and NGO, they will schedule the donating date. users can also check their previous data of remedies transactions.*

Keywords: *PHP, CSS, MySQL, Html.*

1. INTRODUCTION:

A donation of tablets, when well organized and controlled, can save lives and ease the suffering. Actual donation practices can provide savings in budgets for development funding, so that these facilities can be used for other purposes. The "Online Medicine Donation System" serves as a bridge between an immense network of medication donations and NGO'S. Old Age house. A NGO is a non-income-driven organization self-governing of States and all general administrative organizations. They are usually supported by blessings, yet some completely avoid official funding and are run by volunteers in soul. Users of Internet have increased rapidly in the last one or two years and counting is still on it becomes very easy for users to use the website. As we realize there are several current donation sites for pharmaceutical items, they are not up to the standards and require more manual data treatment. We can developing new and upcoming image processing technologies to over come this problem in future. With this technology we can solve all the above-mentioned difficulties and have a very user friendly website.

LiteratureSurvey:

This website comprise so fuse of left-over stuff or item which can be used by poor one. this site comprises of the many required depressed from number of NGO which will acknowledge

our client's gift. Client will have the full track of their file. Guidelines for Remedies Donations Revised 2010 World Health Organization Library Cataloguing in Publication Data Guidelines for remedies donations in revised 2010. 1.Pharmaceutical preparations for supply and distribution.2.

Essential drugs for supply and distribution .3.Relief work.4.Emergencies. 5.Inter institutional relations. 6.Guidelines World Health Organization ISBN 978 92 4 150198 9 rating: 330 First edition 1996, Second edition in 1999, Third edition in 2011 The World Health Organization (WHO) has developed this 3rd version of the Guidelines for Remedies Donations in collaboration with major international organizations involved in humanitarian relief and development assistance. The Guidelines objective to improve the quality of donations of medication in world-wide development assistance and emergency aid. As Good remedies donation preparation is of interest to both donors and recipients.

Objectives:

The aim of there commended system is to enable using of information and communication technologies in order to unite and offer a more effective way for arranging common activities of the NGOs.The advantages of this system are It helps poor people for medication. Many needy people will get cured. With the use of ,all resources can become open to all member institutions that operate in different areas at the same time. Besides this, with the help of web-based tools, NGO can be directly connected to the outer sources. Web-based Job Center: With this center, announcements for the volunteers can be easily made on the web by NGOs. More over, people looking for a job or want to be a volunteer can send their CVs to the related institutions or NGO's.

1. ToolsandTechnology:

1.1 PHP:

PHP (HypertextPreprocessor) is known as a general-purpose scripting language that can be used to develop dynamic and interactive websites. It was among the first server-side languages that could be embedded into HTML, making it easier to add functionality to web pages without needing to call external files for data.

DashboardPage:

1.2 CSS:

CSS is the language for describing the presentation of Web pages, including colors, layout, and fonts. It allows one to adapt the presentation to different types of devices, such as large screens, small screens, or printers. CSS is independent of HTML and can be used with any XML-based mark up language.

1.3MySQL:

MySQL is an open-source relational database management system (RDBMS). Its name is a combination of "My", the name of co-founder Michael Widenius's daughter, and "SQL", the abbreviation for Structured Query Language. A relational database organizes data into one or more data tables in which data may be related to each other; these relations help structure the data. SQL is a language programmers use to create, modify and extract data from the relational database, as well as control user access to the database. In addition to relational databases and SQL, an RDBMS like MySQL works with an operating system to implement a relational database in a computer's storage system, manages users,

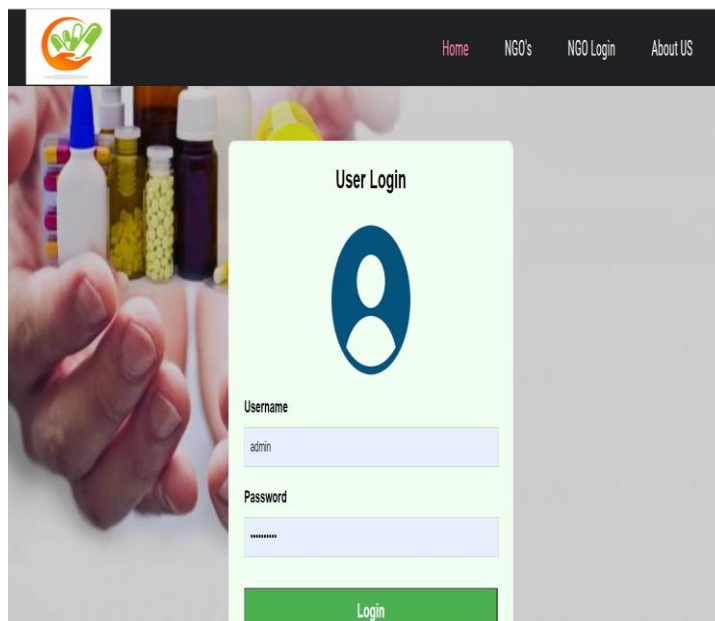

allows for network access and facilitates testing database integrity and creation of backups.

1.4 HTML:

HTML code ensures the proper formatting of text and images for your Internet browser. Without HTML, a browser would not know how to display text as elements or load images or other elements. HTML also provides a basic structure of the page, upon which Cascading Style Sheets are overlaid to change its appearance.
